

JOHN BUONOCORE

FOUNDER & CHIEF ENGINEER

John is a recognized expert radio frequency circuit design, analog electronics, radio communications, antennas, and radar, with specialization in remote sensing and space applications. He spent more than 30 years as a Principal Research Engineer at SRI International before LeoLabs spun out of SRI in 2016. At SRI, John led design work and field deployment for several radar technologies, including high frequency and phased array radar systems like those used by LeoLabs day. John holds multiple patents and has also been published in numerous journals on radar and radio science technology. He holds a B.S. in electrical engineering from San Francisco State University and is a member of the IEEE EMC Society.
